

# QUALITY - FOOD SAFETY – ENVIRONMENT - OCCUPATIONAL HEALTH AND SAFETY SYSTEMS POLICY

As TURKISH DO & CO, our mission is to produce 'reliable and high quality' products and services in line with the standards we set together with our customers.

Our Quality, Food Safety, Environment and Occupational Health and Safety Management Systems are the guides we use to fulfill this mission.

These management systems, which we have established and maintained in accordance with international standards, support our efforts to fulfill the following commitments.

## Our Commitments;

- To meet and even exceed our customers' expectations at the highest level,
- To realize food safety at the highest level at all stages starting from raw material supply to the consumer by providing hygienic environment and conditions,
- To comply with the relevant legal requirements, SHGM requirements and other requirements that we voluntarily declare to comply with,
- To follow developments in the sector, changing customer expectations and technological innovations,
- To realize our processes efficiently and effectively by renewing our systems and infrastructure,
- To identify hazards and risks related to occupational health and safety, eliminating hazards and reducing occupational health and safety risks,
- To create healthy and safe working conditions to prevent work-related injuries and/or health impairments,
- To consult with employees and employee representatives on occupational health and safety and ensuring their participation,
- To identify and control key environmental aspects through a life cycle approach,
- To ensure environmental protection by preventing pollution, ensuring sustainable resource use and reducing greenhouse gas emissions,
- To train all our employees on quality, food safety, environment, global warming, climate change, occupational health and safety; to ensure that the training is understood and to ensure their participation in practices,
- To create awareness and consciousness of quality, food safety, environment, occupational health and safety, global warming and climate change in all our units and employees operating on behalf of our company,
- To implement measures to eliminate or minimize risk by identifying the factors that lead to deviations from our targets with a risk-based approach and to make maximum use of opportunities as they arise,
- To monitor the effectiveness of our management systems and continuously improve them to increase performance.
