

INFORMATION SECURITY MANAGEMENT SYSTEM

Turkish DO & CO is aware that the confidentiality, integrity and accessibility of all kinds of information play a critical role in its sustainable success and good governance practices, and that failure to ensure an adequate level of information security will increase the risk of loss of reputation as well as financial losses.

This information security policy not only outlines the approach of Turkish DO & CO to Information Security management but also sets out the guiding principles and responsibilities for protecting the security of information systems.

The management of Turkish DO & CO undertakes to install, perform, operate, monitor, review, maintain and continuously improve the Information Security Management System in accordance with the TS ISO/IEC 27001 Standard in order to ensure the confidentiality, integrity and accessibility of the information it is obliged to protect.

In our company, which carries out activities in the service sector, we commit;

- To follow the current cyber threats related to the activities we carry out with the "zero day" point of view,
- To comply with the conditions and legal requirements arising from the contracts,
- To ensure that the activities carried out are carried out effectively, accurately, quickly and safely, to carry out the activities we carry out in accordance with the standards required by the sector,
- To carry out our activities by being aware of the risks on their confidentiality, accessibility and integrity in accessing all kinds of corporate and personal information assets belonging to our company, customers, employees, suppliers and business partners,
- To ensure that the information security management system and information security awareness are turned into a corporate culture,
- To ensure that the necessary plans are prepared, implemented and tested to ensure business continuity and service continuity,
- To ensure that the risks to our information assets and processes are evaluated and processed in accordance with accepted risk management methodologies,
- to be in contact with special interest groups in order to benefit from the developing technologies and knowledge in our sector where we provide information-based services.
