SCOPE OF THE ENVIRONMENTAL MANAGEMENT SYSTEM

Turkish DO & CO; has created the environmental management system by taking into account the ISO 14001:2015 Environmental Management System conditions, the system conditions of Turkish DO & CO, legal and other requirements. While determining the scope of the environmental management system, our company has evaluated internal and external considerations, compliance obligations, all activities required for catering production and service, corporate unit function and physical limits, authority and ability to control and effect. Accordingly,

The scope of the Environmental Management System, which includes our activities in all our units, is defined as "AIRLINES CATERING SERVICES".

Our facilities within the scope of the Environmental Management System are as follows.

- Istanbul Atatürk Airport
- Sabiha Gökçen Airport
- Ankara Esenboğa Airport
- Antalya Airport
- İzmir Adnan Menderes Airport
- Milas-Bodrum Airport
- Dalaman Airport
- Adana Airport
- Trabzon Airport
